

Lifkie Lie

+62 831-4175-6668 | llifkie@gmail.com | Tangerang, Banten, Indonesia | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Sixth semester Computer Science student with hands-on experience in full-stack web developer, software developer, and deployment. Experienced in building backend systems and managing databases, as well as developing web and mobile applications through real-world projects. Able to communicate, a disciplined and responsible work ethic, and the ability to work effectively both independently and in team environments. Highly motivated to learn and grow, with strong adaptability in work environments.

EDUCATION

Universitas Multimedia Nusantara - Tangerang, Banten
Bachelor of Computer Science, GPA: 3.35/4.00

Aug 2023 – Aug 2027

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, PHP, Kotlin, Java, Python, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Laravel, Tailwind CSS, Firebase Authentication, Filament

Tools & Platforms: Firebase, GitHub, Figma, Vercel, Hostinger

Databases: MySQL, MariaDB, Firebase Firestore

Languages: Indonesian (Native), English (Intermediate)

EXPERIENCE

PT KAMAR ORANG SEMUA

FEB 2026 – Present

Full-Stack Developer - Internship

- Developed and maintained property management web applications using PHP and Laravel
- Implemented responsive user interfaces and integrated backend services to improve usability and efficiency
- Designed and managed relational databases for property, tenant, and transaction data handling
- Collaborated with the team to enhance system performance, maintainability, and feature scalability

Timedoor Academy

APR 2026 – Present

Part-Time Teacher

- Taught programming and technology, related subjects to kids, juniors, and teens in interactive adaptive learning sessions
- Guided students through hands on coding projects while improving their problem-solving and logical thinking skills
- Prepared learning materials and adapted teaching approaches based on students age groups and skill levels

PROJECTS

PT Dua Naga Perkasa

Full-Stack Developer

- * Built an interactive product catalog website using Laravel (MVC), PHP, and MySQL for a real company client
- * Implemented CRUD operations for product and order management through an admin dashboard
- * Designed and managed relational databases to ensure data consistency and efficient queries

Indahnya Kalimantan Barat

Full-Stack Developer

- * Developed a website to introduce West Kalimantan along with its local tourism destinations and culinary attractions
- * Conducted research and collected digital assets related to tourist destinations and local culinary content in West Kalimantan
- * Deployed the application using Vercel and ensured website stability during user access

Tuku Coffee

Android Developer

- * Built an Android application using Kotlin with RESTful API integration for ordering and transaction features
- * Developed full CRUD admin dashboard systems for managing menus, products, images, and promotional vouchers
- * Engineered voucher and discount application workflows to support promotional campaigns and customer transactions
- * Integrated location-based APIs to calculate distances between users and coffee branches for delivery services
- * Architected delivery tracking features that support branch-to-user order routing similar to modern coffee ordering platforms

- * Implemented secure user authentication, session handling, and Firebase real-time data synchronization for application reliability

Customer Segmentation

Machine Learning

- * Built and evaluated customer segmentation models using clustering techniques on large transactional datasets
- * Translated model results into actionable customer insights

MOTIONWORDS

Backend & AI Engineer

- * Developed real-time hand-tracking AI infrastructure leveraging feature extraction and gesture matching algorithms for live video feedback
- * Engineered end-to-end machine learning pipelines, including data collection systems and training API routes for ASL, SIBI, and BISINDO sign languages
- * Architected dynamic interactive practice modes that evaluate user gestures instantly by mapping live camera inputs against trained AI landmark models
- * Built a multi-language sign comparison system integrating dynamic alphabets, translations, and customizable gesture playback speeds
- * Led the technical foundation setup by initializing the Next.js application architecture, defining project structure, API routing patterns, and data integration standards

ORGANIZATIONAL EXPERIENCE

Japanese Culture Animation and Forte (J-CAFE)

Nov 2023 – Nov 2024

Deputy Head of J-Visual Novel

- * Lead a team in developing a visual novel game project from planning to execution.
- * Managed task delegation, coordinated timelines, and ensured effective team communication.

OMB UMN 2024

Apr 2023 – Aug 2024

Person in Charge (PIC)

- * Introduced new students to Universitas Multimedia Nusantara's academic environment and campus culture.
- * Guide freshmen to adapt successfully to university life through structured activities and mentoring.

Starlight UMN

Feb 2024 – Dec2024

Equipment Division Member

- * Prepared and managed event equipment for Starlight, a university talent competition.
- * Collaborated with multiple divisions to ensure technical and logistical readiness before and during the event.

Student Association Awards UMN

May 2025 – Dec 2025

Security Coordinator

- * Coordinated security operations during the Student Association Awards (awarding night for student associations).
- * Ensured event safety, crowd management, and smooth program flow throughout the event.

CERTIFICATIONS

Participant, Joint International Workshop & Competition 2025 – AI & Game (International), Aug 2025
